Class	BCA
Date	17.08.2026

01 • USER SNAPSHOT

Who is the food delivery user?

The Busy Student

A student who orders meals when time, convenience, or access to food is limited.

PRIMARY GOAL	**Get the right food quickly, safely, and at a reasonable price.**
NEEDS	Fast ordering • Clear prices • Reliable delivery
BEHAVIOUR	Checks ratings • Compares options • Tracks the order
KEY CONTEXT	Mobile-first • Time-sensitive • Value-conscious

02 • EMPATHY MAP

What the user says, thinks, does, and feels

SAYS	• “I want my food to arrive on time.” • “Are there any extra charges?” • “I need an easy way to track it.”
THINKS	• Is this restaurant trustworthy? • Will the food match the photos? • Is delivery worth the total cost?
DOES	• Browses menus and ratings • Compares delivery times • Tracks the order after checkout
FEELS	• Excited when choosing food • Anxious about delays • Frustrated by unclear fees

Needs, frustrations, and expectations

USER NEEDS	FRUSTRATIONS	EXPECTATIONS
• Accurate delivery estimates	• Late/unpredictable orders	• Real-time tracking
• Easy navigation and checkout	• Hidden fees	• Useful ratings/reviews
• Transparent total cost	• Food-quality mismatch	• Relevant offers
• Safe, dependable delivery	• Difficult support/refunds	• Quick issue resolution

04 • DESIGN DIRECTION

Turning empathy into a better experience

01 DISCOVER — Show useful filters, ratings, photos and delivery estimates.

02 DECIDE — Make item prices, taxes, delivery fees and offers transparent.

03 ORDER — Keep checkout short and confirm the order clearly.

04 TRACK — Provide accurate live status and proactive delay updates.

05 RECOVER — Make support, refunds and issue resolution simple.

Empathy Map Takeaway: The user is not only buying food — they are buying convenience, certainty, and peace of mind.
